
Killer bees.

Posted by Treeman - 09/26/2005 10:27am

Let's talk about killer bees. Joe Maher had a bad experience with killer bees. I believe he was hit 400 times if I remember correctly during a climb.

What countries have them?

What are the differences with species? Are some more poisonous?
Are some more aggressive?

How can you spot them?

How can you avoid them?
