Re:Elliot Return From China

I read that Elliot Su has recently returned from a couple of weeks teaching Tree Climbing at a local University in China and was wondering if he is about to post something on this board about his adventures in China. It sounds from my other sources that he had a great time, trained eight students/researchers and someone posted some cool photos of his students in full climbing gear. So, Elliot if you read this, please tell us the rest of the story .B)
