## Chimps need swings too

Posted by TreeTramp - 07/18/2007 10:29pm

---

The Kansas City zoo in Swope Park website link

They have asked us to come climb in the Chimp area and secure two swings for them to play on.

[http://www.janegoodall.org/chimp\\_central/assets/chimp-tree.jpg](http://www.janegoodall.org/chimp_central/assets/chimp-tree.jpg)

One will be a single fire hose secured to a limb 41' high that has a loop formed with a PVC pipe inside it to seat upon.

The other is a 5 foot square mat woven from fire hose that needs to be elevated to simulate their normal arboreal nests.

Oh boy at 10am Saturday those Chimps are going to have fun.

Film at 11

See you at the top,  
Dan House
