
1NEW!!!! or...not really

Posted by nickfromwi - 09/21/2007 12:45pm

When I go to the main forum page where I can see all the topics, there is a feature where it shows you where a recent post was made. Ideally, this would show a post that I haven't seen yet, so I don't have to spend time looking at threads that haven't changed since last I've checked.

Can it be set that way? Right now I see threads that I posted yesterday...and they are marked as NEW!.

love

nick,

under the list of forums is a list of most recent posts. the threads will be listed there. For more info, at the top of the forum is a 'recent posts' link where you can decide what 'new' is: 4 hours, 24 hours, etc. The thread also shows up there.
