
Finaly, I have my gear!

The last two days have been absolutely wonderful around here.

Tuesday the UPS truck brought me a Sherrill order containing an Arbormaster BRW rope (150' with 1 eye splice) 2 split tails, 200' of 3mm spectra throwline, 14 & 16 oz throw weight. Throwline cube, and a cambium saver.

And on Wednesday the UPS truck brought my new tribe order. Tengu Harness, Line Mug, and 3 Petzl Williams HMS Carabiners.

I cut 50ish feet off of the throw line to load into the line mug with the 14oz weight. I love it, never used the throwline in the tree before. I was able to do WAY more than I was by tossing the tail of my line up over the next TIP.

Very Very Happy,
Carl
