---

Hi, I was wondering if anyone can direct me to the right kind of tree climbing gear for a beginning climber on a budget.

thanks

Start by getting the book *Tree Climbers Companion* and the Video from Treeman (TCI) about Basic Tree Climbing Instruction. By reading the book and seeing the demonstrations from the video you will get a better sense of what you definitely need to have and to get it from. After you take care of that we can suggest a basic gear set you will need to buy to get in a tree safely and have some fun climbing trees.
